

**Article Picture****Article Description**

Foldable, crane-able **heavy-duty tool bucket** for lifting tools and materials securely up to 100 kg to higher work places.

The heavy-duty tool bucket with its 36 cm opening is 100 cm tall and especially laid out for longer and heavy tools and materials.

Made of strong weatherproof polyester fabric, durable HDPE bottom and a 4 mm rubber bottom insert.

The opening is stabilized by a coated steel ring

For transport it folds to minimum volume.

**Technical Data:**

- WLL (working load limit)[kg]: 100
- Safety Factor: 4
- Material:
  - Corpus: double layer PVC coated Polyester fabric Oxford 600D
  - Webbing: Polyester fabric 50 mm
  - Bottom: HDPE
  - Insert: Virgin rubber 4mm strong
- Content [l]: 70
- Diameter top [mm]: 380
- Diameter Bottom [mm]: 260
- Height [mm]: 1000
- Netweight [g]: ca. 2100

**Range of Application:**

- Power line construction
- Railway line construction
- Industrial construction
- Scaffolding construction
- Windenergy construction
- Roof builder
- Free climbing work
- Rope storage
- ... and many others more.

**Information for use:**

Maximum service life: 5 years from first use.

**Visual and functional check before use.** If you recognize damage of webbing, corpus or bottom, it has to be withdrawn from operation.

Inspection in accordance with legal national guidelines **but at least once a year**

**Certificates/ Assessments:**

Nutzlastprüfung durch das Sächsische Textilforschungsinstitut e.V. (STFI)
